FIG. 1 is a perspective view of a circular electronic device. The device includes a cover 12 and a main body 1. The cover 12 is shown in an open position, revealing the main body 1. The main body 1 includes a display 2 and a bezel 3. The bezel 3 is a ring-shaped component that surrounds the display 2. The bezel 3 has a series of contacts 12c and 12g2, 12g3, 12g4. The cover 12 has a series of contacts 12c1 and 12c2. The device is shown in an open position, with the cover 12 hinged at one end and the main body 1 at the other. The hinge 12a is a mechanical component that allows the cover 12 to rotate. The latch 12g1 is a component that locks the cover 12 in the open position. The contacts 12c and 12g2, 12g3, 12g4 are electrical contacts that connect the cover 12 to the main body 1. The bezel 3 is a ring-shaped component that surrounds the display 2. The bezel 3 has a series of contacts 12c and 12g2, 12g3, 12g4. The cover 12 has a series of contacts 12c1 and 12c2. The device is shown in an open position, with the cover 12 hinged at one end and the main body 1 at the other. The hinge 12a is a mechanical component that allows the cover 12 to rotate. The latch 12g1 is a component that locks the cover 12 in the open position. The contacts 12c and 12g2, 12g3, 12g4 are electrical contacts that connect the cover 12 to the main body 1.
